

PROFILE SUMMARY

Results-driven **MERN Stack Developer** with **3+ years of experience** building scalable web applications, enterprise-grade admin panels, and backend services using **Node.js**, **Express.js**, **MongoDB**, and **Next.js APIs**. Strong expertise in **React.js**, **REST APIs**, **Authentication**, and **Performance Optimization**.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, Middleware, Routing

Database: MongoDB, **MySQL**, **Redis**

Queue : BullMQ

ORM: Prisma

State Management: Redux Toolkit, RTK Query, Context API

Real-time: Socket.io, Firebase Cloud Messaging

Authentication: JWT, Role-Based Access Control

Tools: Git, Postman, PM2

Deployment - AWS, Vercel

WORK EXPERIENCE

Mobulous Technologies Pvt. Ltd. – MERN Stack Developer (Oct 2024 – Present)

- Developing scalable full-stack applications using Next.js, React.js, Node.js, and MongoDB, focusing on performance, real-time features, and production-ready solutions.

Arudan Technologies Pvt. Ltd. (Jan 2023 – Oct 2024)

- Built responsive web applications using React.js, Tailwind CSS, and REST APIs, improving performance and user experience.

PROJECT EXPERIENCE

Worldclass Gourmetfoods – Corporate Website • [Live](#)

- Developed a dynamic and responsive corporate website for WorldClass Gourmetfoods, an international food distribution company, using React.js.
- Implemented React Context API for efficient global state management, potentially handling data like company information, certifications, or multi-language content to ensure consistency across components.

Dagna De – Non-Profit Organization Portal • [Live](#)

- Engineered a scalable front-end architecture using React.js and Redux to manage complex application state efficiently, ensuring a smooth and reliable user experience as the platform grows.
- Implemented comprehensive multi-language support (i18n) using i18next (likely a typo for i18next or a similar library) to cater to the organization's diverse German and African audience, enhancing accessibility and international reach.

Kovacs - AI-Powered Fitness Platform

- Engineered an intelligent recommendation system by integrating ChatGPT-5 AI to analyze comprehensive user profile data (fitness level, goals, preferences) and generate customized workout plans and exercise suggestions.
- Designed and optimized database schemas for efficient storage and retrieval of complex user fitness profiles, workout history, and AI-generated recommendations.
- Integrated Stripe payment gateway for subscription management and premium feature access, enabling monetization of the platform's AI capabilities.

iOncology – Digital Healthcare Platform for Cancer Care • [Live](#)

- Engineered a high-performance, SEO-optimized website using Next.js and React for iOncology Solutions Ltd., a specialized provider of remote oncology services.
- Leveraged Next.js's server-side rendering (SSR) and static site generation (SSG) to ensure fast load times, excellent search engine visibility, and a seamless user experience across all devices.
- Developed and integrated dynamic API integrations to fetch and display real-time information for core services, including Tele-Video Consultations, Remote Radiotherapy Planning, and Digital Radiology Reporting.
- Focused on UI creation to present complex medical information accessibly and empathetically, building trust with both healthcare providers and patients seeking cancer care solutions.

EDUCATION

BCA(Bachelor of Computer Applications) – MGKVP University

MCA(Master of Computer Applications) - UTTRANCHAL University
